Matissart

HIGH PRODUCTIVITY BLOW MOLD SYSTEMS

MORE RECYCLABILITY, LESS ENERGY, LESS MATERIAL, FASTER

30 years of innovative solutions:

3D JET COOLING: 10 years of R&D focused on energy reduction.
PCR Material optimized Molds.
Long Lasting and Strongly Engineered Molds.
Numerical simulation for less packaging weight.

Global expertise

Coverage across Europe, Africa, Middle East, Asia, Oceania, Americas

3D JET COOLING©

+30% faster cycles, energy savings, extended mould lifetime

Moulds 1 ml → 800 L

(1–25 cavities, 1700 mm stroke)

One supplier for all packaging sizes – bottles to industrial drums

Stackable container moulds

Pneumatic, hydraulic or electric movements – patented deflashing

3D CAD & FEA

Lightweighting, higher mechanical performance

Maintenance & Retrofit

Full service: inspection, repair, optimization – even for non-Matissart moulds

Industrial parts moulds

Complex shapes – ducts, reservoirs, technical components

Sustainable & Responsible Vision

Commitment to circular economy and eco-innovation.

Expert commissioning

On-site commissioning with performance validation. Fine-tuning, operator training, and production startup assistance.
